Learning Selenium

with Meaghan Lewis

From Command Prompt

To look up path:

echo %PATH%

To add gecko driver to path:

set PATH=%PATH%;C:\Users\your_username\Downloads\geckodriver

From Dialog Window

On Windows systems, to change the system path, right-click **My Computer/This PC** and choose **Properties**.

In the dialogue that appears, select **Advanced system settings** > **Environment Variables**.

Under **System variables**, select to edit path and add new entry:

"C:\Users\your_username\Downloads\geckodriver" to the Path variable and click **OK**.
